

IN THE DRAWINGS:

With this Amendment Applicant is replacing the previous Fig. 12, and canceling the previous Fig. 13.

In particular the previous Fig. 13 is now the present Fig. 12. This has been done to overcome the objection with regard to new matter. Fig. 13 has also been renumbered as Fig. 12, in order to show the harmonic drive as claimed in claim 18. Since the harmonic drive was described in claim 18 as originally filed, Fig. 13 should not add new matter to the application. In particular new Fig. 12 shows a typical harmonic drive, such as described in U.S. Patent 4,840,090. Applicant has also amended the specification to remove any indication that Fig. 13 has a wave generator. In particular the description of new Fig. 12 only indicates that the element 17, 24 and 25 are part of the harmonic drive.
